x Global longitudinal strain (GLS), derived from speckle-tracking echocardiography (STE), is a widely used and reproducible left ventricular deformation parameter; assessment of multilayer strain components has also become possible. However, its association with comorbidities/symptoms in low-risk populations without cardiac disease remains understudied.

In this manual all commands are given in code boxes, where the R code is printed in black, the comment text in blue and the output generated by R in green. All comments/explanations start with the standard comment sign ' # ' to prevent them from being interpreted by R as commands. This way the content in the code boxes can be pasted with their comment text into the R console to evaluate their ...
