Office: 194 Julis Romo Rabinowitz Building Mailing address: Department of Economics Julis Romo Rabinowitz Building Princeton University Princeton, NJ 08544

### **Mark W. Watson - Princeton University**

Beginners with little background in statistics and econometrics often have a hard time understanding the benefits of having programming skills for learning and applying Econometrics. 'Introduction to Econometrics with R' is an interactive companion to the well-received textbook 'Introduction to Econometrics' by James H. Stock and Mark W. Watson (2015).

Terminology. In gretl parlance, a database is a (usually large) collection of series that may be of mixed frequencies and observation ranges. The data are stored in binary format, as single-precision "floats". You access such files via gretl's File/Databases menu. From there you can import selected series into gretl's workspace.

### **Data for gretl**

The AEA's Continuing Education Program aims to help mid-career economists and others maintain the value of their human capital. It is tailored primarily to faculty at liberal arts colleges and teaching-oriented state universities that may have fewer research opportunities than colleagues at universities with PhD programs.

This section needs expansion with: . You can help by adding to it. (October 2017)

### **Autoregressive conditional heteroskedasticity - Wikipedia**

A Newey-West estimator is used in statistics and econometrics to provide an estimate of the covariance matrix of the parameters of a regression-type model when this model is applied in situations where the standard assumptions of regression analysis do not apply. It was devised by Whitney K. Newey and Kenneth D. West in 1987, although there are a number of later variants.
