S-1 Thinking Independently. Principle: Critical thinking is independent thinking, thinking for oneself. Many of our beliefs are acquired at an early age, when we have a strong tendency to form beliefs for irrational reasons (because we want to believe, because we are praised or rewarded for believing).

Strategy List: 35 Dimensions of Critical Thought

Today's internet, accessed by fixed and mobile networks, allows us to transmit files, voice and video across the planet. With the emergence of an ultra-responsive and reliable 'Tactile Internet,' advanced techniques in robotics and artificial intelligence, we predict the emergence of an 'Internet of Skills' which allows the transmission of labor globally.

Recursion (adjective: recursive) occurs when a thing is defined in terms of itself or of its type. Recursion is used in a variety of disciplines ranging from linguistics to logic. The most common application of recursion is in mathematics and computer science, where a function being defined is applied within its own definition. While this apparently defines an infinite number of instances ...

Perspective (from Latin: perspicere "to see through") in the graphic arts is an approximate representation, generally on a flat surface (such as paper), of an image as it is seen by the eye. The two most characteristic features of perspective are that objects appear smaller as their distance from the observer increases; and that they are subject to foreshortening, meaning that an object's ...

We can put a man on the moon, but back pain [NIH] is just as miserable as ever, and more costly to society than ever. There are no miracle cures or back whisperers. Not a single popular treatment has ever been shown to work well.¹ When we are "shot by the witch,"² it's going to run its course like a head cold in most cases, or drag on much longer in a few, and there's not much anyone ...
