Mitochondria - Turning on the Powerhouse Mitochondria are known as the powerhouses of the cell. They are organelles that act like a digestive system which takes in nutrients, breaks them down, and creates energy rich molecules for the cell. The biochemical processes of the cell are known as cellular respiration. Many of the reactions involved in cellular respiration happen in the mitochondria.

Carbon dioxide (chemical formula CO₂) is a colorless gas with a density about 60% higher than that of dry air. Carbon dioxide consists of a carbon atom covalently double bonded to two oxygen atoms. It occurs naturally in Earth's atmosphere as a trace gas. The current concentration is about 0.04% (410 ppm) by volume, having risen from pre-industrial levels of 280 ppm.

Carbon dioxide - Wikipedia

Answer to: What maintains the secondary structure of a protein? By signing up, you'll get thousands of step-by-step solutions to your homework...

What maintains the secondary structure of a protein ...

Your feedback probably stinks nothing personal ;). More commonly, students receive feedback but it doesn't do a whole lot of good. Kluger and DeNisi conducted a meta-analysis of studies of feedback and found that the average effect of writing feedback intervention on performance was quite positive.. However, 38 percent of the time the control group actually outperformed the feedback groups ...

Give Your Students Better Writing Feedback

Earthquakes A science lesson on earthquakes. Volcanoes A science lesson on volcanoes. Why does the wind blow? Experimenting with moving Air The lesson gives a basic explanation of the phenomenon of air movement or wind and includes a simple experiment to be done in the classroom with the teacher.

ATTENTION! ATTENTION! ATTENTION! Please be aware: the Escambia Civics benchmark sites are no longer available. The Escambia Civics review site was designed as a partnership with FJCC and we have worked with them to design the new and very much improved Civics 360 website. It is free and available at Civics 360 and includes updated videos and readings.

Part C - Animal life cycles In the life cycle of an organism, meiosis is paired with the process of fertilization. Understanding the life cycle of an organism is the key to understanding how sexual reproduction ensures the inheritance of traits from both parents and also introduces genetic variation.
