The Wurtz reaction, named after Charles Adolphe Wurtz, is a coupling reaction in organic chemistry, organometallic chemistry and recently inorganic main group polymers, whereby two alkyl halides are reacted with sodium metal in dry ether solution to form a higher alkane: $2 R-X + 2 Na \rightarrow R-R + 2 Na + X^-$. Other metals have also been used to effect the Wurtz coupling, among them silver ...

Wurtz reaction - Wikipedia

In a molecule, a stereocenter is a particular instance of a stereogenic element that is geometrically a point. A stereocenter or stereogenic center is any point in a molecule, though not necessarily an atom, bearing groups, such that an interchanging of any two groups leads to a stereoisomer. The term stereocenter was introduced in 1984 by Kurt Mislow and Jay Siegel.

Stereocenter - Wikipedia

IIT JEE Advanced Previous Year Question Papers IIT JEE Advanced preparation can only be complete and fully equipped after solving previous year question papers. It gives a student an insight and live experience of the examination. One can also get an analysis of where one stands with their preparation. Most importantly, a student can know [...]

IIT JEE Advanced Previous Year Question Papers with ...

Ethyl acetate is an organic compound that is an ester derived from the combination of ethanol and acetic acid. Its chemical formula may be written as $CH_3CH_2OC(O)CH_3$ or $CH_3CO_2C_2H_5$, and chemists often abbreviate its name as EtOAc. It is a colorless liquid with a characteristic smell that is slightly sweet and fruity.

Ethyl acetate - New World Encyclopedia

Aniline, phenylamine, or aminobenzene is an organic compound with the formula $C_6H_5NH_2$. It is an organic chemical compound, specifically an aryl amine, consisting of a phenyl group attached to an amino group. The chemical structure of aniline is shown at the right. It is now used mainly in the manufacture of polyurethane, although it previously was mainly used more for dyes and drugs.

Aniline - New World Encyclopedia

Aim: The objective of this exercise is to prepare cyclohexene from cyclohexanol and determine the efficiency of this conversion. **Experimental learning objectives:** How to; set up a distillation apparatus and perform a distillation

Preparation of cyclohexene from cyclohexanol.
