spec number title notes; TS 32.005: Telecommunications management; Charging management; 3G call and event data for the Circuit Switched (CS) domain : TS 32.008: Subscriber and Equipment trace

3GPP specification series: 32series

In this article, we are going to build a Fire Alarm System using Arduino, LM35 Temperature Sensor and GSM Module. The objectives of this fire detector using arduino is to sense the surroundings for occurrence of fire with help of LM35 temperature sensor, and send 3 SMS alerts to two mobile numbers stored inside the arduino program if fire is detected (using GSM Module).

GSM based SMS Alert Fire Alarm System using Arduino

The red wire is to be connected directly to the other red wires of each alarm and nothing else. Aside from the black and red wires for power, a third one must run from alarm to alarm for it to work AND must not under any circumstance touch anything else as it can cause the alarms to short and/or be permanently damaged.
