Augmentative and alternative communication (AAC) is an umbrella term that encompasses the communication methods used to supplement or replace speech or writing for those with impairments in the production or comprehension of spoken or written language. AAC is used by those with a wide range of speech and language impairments, including congenital impairments such as cerebral palsy ...

Augmentative and alternative communication - Wikipedia

A visual scene is a view of an environment consisting of drawings, photographs, and/or virtual environments organized in a meaningful way. Visual scenes can be used to represent situations, routines, places, or experiences. They can be presented via fixed or dynamic displays (Beukelman & Mirenda, 2013).

Augmentative and Alternative Communication: Key Issues

1. Introduction. Today, the Internet is used by approximately 3.7 billion people all around the world (InternetWorldStats, 2016). Especially the multitude of Internet-communication applications and social networking sites (SNS) - such as Facebook, WhatsApp, Twitter, and Instagram - as well as the extremely widespread use of smartphones represent opportunities for users.
