In "Harvest of Fear," FRONTLINE and NOVA explore the intensifying debate over genetically-modified (gm) food crops. Interviewing scientists, farmers, biotech and food industry representatives ...

PBS - harvest of fear

The theories developed in the early 20th century to integrate Mendelian genetics with Darwinian evolution are called the modern synthesis, a term introduced by Julian Huxley.. Evolutionary

biologists have subsequently modified this concept, such as George C. Williams' gene-centric view of evolution. He proposed an evolutionary concept of the gene as a unit of natural selection with the ...

Gene - Wikipedia

All cancer is caused by gene changes building up inside a cell. Those changes (gene mutations) happen in several ways. Some gene mutations are caused by factors outside the body (exposures), some happen during normal cell division, and we are born with some gene mutations.

Hereditary Cancer

This no-prep paper AND digital paperless product is all of the notes, labs, activities, practices, and tests you need to teach an evolution unit in your biology class. Content covered includes principles of natural selection, mechanisms of microevolution, Hardy-Weinberg principle (genetic equilibriu...

In molecular biology, transformation is the genetic alteration of a cell resulting from the direct uptake and incorporation of exogenous genetic material from its surroundings through the cell membrane(s). For transformation to take place, the recipient bacteria must be in a state of competence, which might occur in nature as a time-limited response to environmental conditions such as ...

Transformation (genetics) - Wikipedia

bacteria: Tiny, single-celled, prokaryotic organisms that can survive in a wide variety of environments. Some cause serious infectious diseases in humans, other animals, and plants. base: The DNA ...
